Mohammed Sadik
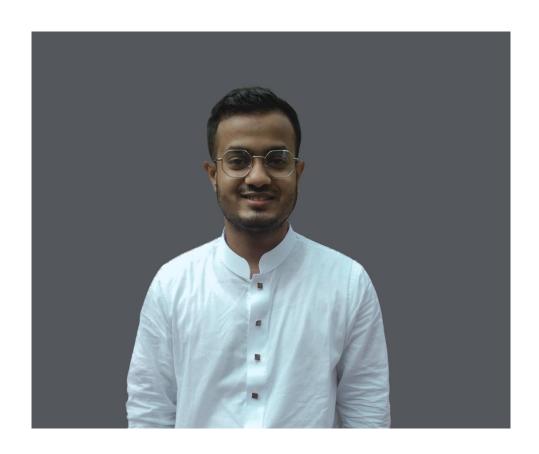

Content

Introduction

Hi, I'm Sadik, a multi-talented human. Most of the time I develop digital product.

I wear many hats, including product developer, full-stack developer, front-end developer, MERN stack developer, and mobile app developer (React Native). Additionally, I am a passionate traveler, photographer, and instructor. I am working since 2020 in the software development field and as an IT teacher since 2017.

Mohammed Sadik - Introduction

I don't like to define myself by the work I've done. I define myself by the work I want to do. Skills can be thought, but personality is inherent. As for me, I like to keep learning, keep challenging myself and pursue exciting projects that matter.

I am passionate about learning, growing and excelling in programming. I wake up every morning excited to be as productive every day as I can.

Since beginning my journey as a programmer from 2020, I've done remote work for agencies, consulted for startups, and collaborated with talented people to create digital products for both business and consumer use.

I'm quietly confident, naturally curious, and always leveling up my game by tackling one problem at a time. I'm a people-person with deep emotions, empathy and a natural storyteller. My passion shines brightest in sharing my creative expressions with others.

Biography

My journey with programming started at the age of 14 when I was attending the High School. My brother Shahzahan is my first mentor to my programming career. He helped me to widen my range of knowledge and gather experiences through various disciplines, such as front-end development, video editing, teaching, photography, videography, psychology and many more. Fast forward after few years, I'm now focusing on programming, leadership, teaching, research, advising and entrepreneurship.

I do a lot of work with honesty, appetite and commitment. Over the past years I had the opportunity to drive and do hands-on work for some amazing brands from all over the world. Beside my programming career I've also done teaching on humans' computer skills in Bangladesh, where I worked as a lead instructor of the top IT company in Bangladesh market. After that I become a co-founder and entrepreneur, trying to build my own startup company in Bangladesh.

I'm currently self-employed and am working with freelance client base. In my free time, I explore new places specially hills as I reside near the largest sea-beach in the world. I love new adventures, meeting new people, and mostly capturing moments. Besides, I make tutorial videos for the worldwide audience on YouTube and edits travel videos in free time.

Experiences

Full Stack Engineer (App and Web)

Self-Employed
August 2020 – Present

As a self-employed developer, I had a chance to work with some of the most talented people worldwide.

My clients are mostly start-ups or small and mid-sized companies, where I was being challenged to build the right features for the right people.

I grow as a developer by collaboration, research, advice, managing people and lead teams to bring their product into reality. By focusing on providing solution to a problem or a business need and creating a seamless user experience, desirable, unique, sticky and covetable.

EC Tech

Co-founder, Director and Trainer
December 2022 – Present

The leading Ed-tech platform in Bangladesh. We help students of all level to unlock the power of computing.

As a co-founder, I am playing an instrumental role in starting and building this platform, and as a trainer, I am responsible for delivering educational content and developing the skills of my learners.

I'm an educator, mentor and leader who is passionate about helping others learn and grow.

Locals Liftoff

Frontend Engineer (React.js) | Remote
January 2022 – June 2022

Locals Liftoff, a Poland-based digital solutions firm, excels in developing web applications, websites, and mobile apps that embody innovative technology and design.

I was a frontend engineer of react.js in this leading IT firm and responsible to-

- Enhance the performance and responsiveness of the product by adding new features.
- Maintain excellent coding standards and practices.
- Design, develop and maintain applications, components, and web user interfaces.
- Bug fixing, troubleshooting, and application support.
- Work closely with backend engineers to integrate APIs and develop dynamic, feature-rich web applications.
- Enhance user interface designs.
- Implement and manage design systems, ensuring consistent and responsive design across various platform.
- Ensuring robust and scalable infrastructure.
- Collaborate with the founder across various business/technical challenges to provide an excellent user experience.

Silicon Institute of Technology (SiT)

Senior Technical Instructor and Coordinator
June 2022 – December 2022

SiT - Silicon Institute of Technology is a top leading Ed-tech company in Bangladesh since 2016. I was a student of their first batch and became an instructor after completing the course successfully.

I've experience working and level up with this startup. I started teaching after graduated from High School in 2017 as a part time junior trainer and join again as the senior instructor and coordinator later in 2022. As a senior instructor and coordinator, I was responsible to-

- Prepare training materials for courses and making assignments for students.
- Trained mentors and students to work on various computer software, including web development.
- Conduct training and lead other trainers.

Trainer
March 2017 – February 2019

Responsible for training students on the fundamentals of computers and business software including database management.
